Mentor: Anshul Sarawagi | Team Size: 4

Key Skills: HTML CSS javascript MySQL

Travel World is a responsive tour booking website where users can explore various travel packages and make online bookings. The website allows users to view package details, calculate total cost based on number of people, and submit booking information through a form. I designed the frontend using HTML, CSS, and JavaScript, and developed the backend using PHP and MySQL to store and manage booking records. This project helped me understand full-stack development, form validation, and basic CRUD operations.
